FUNDAMENTALS of Pediatric Anesthesiology 2010

Pediatric Anesthesiology for the Generalist

April 17 - 18, 2010 • The Grand Hyatt • San Antonio, Texas

The Society for Pediatric Anesthesia is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The Society for Pediatric Anesthesia designates this educational activity for a maximum of 13 AMA PRA Category 1 Credit(s)™. Physicians should only claim credit commensurate with the extent of their participation in the activity.
Welcome

The Fundamentals of Pediatric Anesthesiology is now in its second year. The Society for Pediatric Anesthesia offers this course to practitioners in community practice with the intention of providing them with the core knowledge important to the perioperative care of children. The meeting will take place April 17-18, 2010 at the Grand Hyatt San Antonio, San Antonio, TX. This beautiful and spacious facility is large enough to accommodate both “Fundamentals” and The Society for Pediatric Anesthesia/American Academy of Pediatrics Section on Anesthesia Winter/Spring meeting concurrently.

This meeting is brought to you by the Society for Pediatric Anesthesia in recognition of its role in providing high quality educational offerings to community practitioners who provide the majority of care to children.

The program runs concurrently with the SPA/AAP Winter/Spring meeting to ensure that the most knowledgeable, recognizable and experienced speakers in the field are available to provide those in attendance with the best value for their CME dollar. This year the program is confined to Saturday and Sunday to minimize time away from your practice. Although registration is separate, the concurrency of this meeting with the SPA Winter/Spring meeting also makes many of the SPA Winter/Spring meeting workshops and refresher courses available to those attending “Fundamentals”.

The program covers many of the most relevant topics for those who care for children in the community. Included is a session devoted to; “Caring for the Healthy Child,” featuring discussions of premedication, when to cancel a case, and parental presence in the operating room with Lucy Everett, MD; Anna Varughese, MD; and Zeev Kain, MD. Pain Management in Kids is the topic for the second session followed by a lunch discussion entitled; “Legal Briefs” that will feature Steve Hall, MD and Matt Kumar MD, JD. Dr. Kumar is both a practicing anesthesiologist and practicing attorney. On Sunday the legal theme will continue with lessons from ASA Pediatric Closed Claims with three excellent speakers. The meeting will wrap up with a session on Controversies in Pediatric Practice; including learning disabilities and anesthesia exposure, obesity in children, the use of cuffed endotracheal tubes, and credentialing in pediatrics. Attendees may wish to participate in Saturday’s workshops and refresher courses available to those attending “Fundamentals”.

It has been my pleasure to organize this meeting along with Paul Samuels, MD who will be the host for next year’s meeting in San Diego. Paul and I along with the SPA leadership would like to extend this invitation to join us in San Antonio where the focus will be on caring for children.

Sincerely
Randall Flick, M.D., M.P.H., F.A.A.P.

*Grand Club – our exclusive “hotel within a hotel” is a refreshing oasis for guests who desire a higher level of service and privacy. Spacious guest rooms reflect heightened refinement, with additional features such as continental breakfast, newspaper and evening hors d’oeuvres provided daily. The private Grand Club lounge offers the ideal setting for casual social gatherings. A dedicated concierge staff is available at all times to provide personalized service.

The Society for Pediatric Anesthesia has reserved a block of rooms at the above hotel. In order to receive the special conference rate, advise the reservations agent at the hotel that you are attending the SPA Conference. Reservations must be made prior to March 23, 2010 in order to receive the conference rates. Reservations received after this date will be on a space available basis at regularly published rates. Please call, fax or email the hotel. A 16.75% tax will be added.

Please Reserve:

## FRIDAY, APRIL 16, 2010

1. **1:30-3:30 pm** Junior Faculty Research Workshop: Jerome Parness, MD, PhD | N/C
2. **1:30-3:30 pm** Success in Academics: Sam Yanofsky, MD; Franklin P. Cladis, MD; Ira Todd Cohen, MD, MEd; Divya Dixit, MD; Julie G. Nyquist, PhD; Joseph R. Tobin, MD, FAAP, FCCM; Mary Lou Voytko, PhD | N/C
3. **4:00-6:00 pm** Pediatric Airway: David M. Polaner, MD, FAAP; Jeffrey L. Galinkin, MD, FAAP; Cheryl K. Gooden, MD, FAAP; Geoffrey A. Lane, MB, BCH; Bruno Marcinik, MD, Peter Szmk, MD | $60
4. **4:00-6:00 pm** Peripheral Vascular Access: Gregory J. Schears, MD; Darryl H. Berkowitz, MB, BCH; Dawit T. Haile, MD; Scott D. Markowitz, MD; Luis M. Zabala, MD | $60
5. **4:00-6:00 pm** TEE: James A. DiNardo, MD; Lauren J. Cornella, MD; Jochen D. Muehlischlegel, MD | $60
6. **4:00-6:00 pm** Integrating Acupuncture in Pediatric Perioperative Care and Pain Medicine: Yuan-Chi Lin, MD, MPH; Brenda Golianu, MD; Rosalie Tassone, MD, MPH Shu-Ming Wang, MD | $60
7. **4:00-6:00 pm** Overview of Personal Financial Planning Workshop: Jonathan D. Griswold, MD | $60

## SATURDAY, APRIL 17, 2010

1. **1:30-3:30 pm** Fellows Research Workshop: Alan R. Tait, PhD | N/C
2. **1:30-3:30 pm** Advanced Ultrasound Guided Regional Anesthesia Workshop: SENIOR FACULTY - Santhanam Suresh, MD, FAAP; Adrian T. Bosenberg, FFA (SA); Per-Arne Lonnqvist, MD; Edward R. Mariano, MD. ASSOCIATE FACULTY - Sean Flack, MB, ChB, FCA, DA; Arjunan Ganesh, MBBS; Mounir Soliman, MD; Jeffrey L. Steinfeldt, MD | $175
3. **1:30-4:30 pm** Simulation Workshop: Anita Honkaren, MD; Richard H. Blum, MD, MSEE; FAAP; Michael I. Chen, MD; Rebecca E. Claure, MD; Harshad G. Gurnaney, MD; Robbie Hales, MB, MA; Medical University of South Carolina; ChB; Andrew Piltaway, MD; ACGME Core Workshop: Samuel David Yanofsky, MD, MSc; Ira T. Cohen, MD, MEd; Barry Markowitz, MD, MPH; Niurka Rivero, MD; Randall Wetzel, MBBS | $60
4. **1:30-4:30 pm** Dexametomidine: Clinical Applications, Mechanisms of Action and New Development Workshop: Keira P. Mason, MD; Constantinos Chryssostomou, MD; Julia C. Finkel, MD; Nick Franks, FRCA, FMedSci; Gregory B. Hammer, MD; Mohamed A. Mahmoud, MD; Joseph D. Tobias, MD | $60
5. **1:30-4:30 pm** Ultrasound Vascular Access: Coordinator - Stuart R. Hall, MD; Peggy P. Dietrich, MD; Erin A. Gottlieb, MD; Courtney A. Hardy, MD; Tetsu Uejima, MD | $60

## REFRESHER COURSES

1. **1:30-2:30 pm** Pediatric Jehovah’s Witness and Other Dilemmas: Samuel D. Wald, MD | N/C
2. **2:30-3:30 pm** Anesthesia for Noncardiac Surgery in a Patient With CHD: Steve Stayer, MD | N/C

Please submit this form with the Pediatric Anesthesiology 2010 Scientific Program Registration form on Page 5.

Name (Please print): ________________________________
Objectives

**Should I Cancel This Case - Identifying the Child at Risk**
Lucy Everett, MD
At the conclusion of this session the participant will understand guidelines for facilities caring for children in the perioperative period, and considerations in a variety of locations of care such as the freestanding ambulatory surgery center. The participant will gain understanding of a variety of coexisting diseases (respiratory, cardiac, neuromuscular) which might alter the decision to proceed with surgery in a general care setting.

**Successful Premedication: Drugs, Doses & Routes**
Anna Mary Varughese, MD, MPH
Upon completion of this lecture, the attendee will:
1. Identify children that are at risk for distress during induction and that may benefit from premedication
2. Be conversant with the various drugs available for premedication, their doses and mode of administration.

**Parental Presence During Induction: Always A Good Thing?**
Zeev N. Kain, MD, MBA
Following this discussion attendees will develop an appreciation for the potential advantages and disadvantages of parental presence in the operating room.

**The Single Shot Caudal Block in Community Practice**
Lynn D. Martin, MD, FAAP, FCCM
At the end of this educational session, the participants will be able to
1. Utilize their enhanced knowledge of pediatric anatomy to safely identify the caudal epidural space
2. Integrate updated information regarding the risks and benefits of the caudal block into their daily practice with children.

**Intraoperative Caudal and Lumbar Catheters**
Tracy E. Harrison, MD
Upon completion of this lecture the attendees will:
1. Understand the indication for caudal and lumbar catheters
2. Understand the pertinent anatomy regarding epidural catheters
3. Understand specifics regarding medications administered via epidural catheters

**Brachial Plexus Blocks Simplified**
Santhanam Suresh, MD, FAAP
Upon completion of this lecture, attendees should be able to
1. Understand brachial plexus anatomy as it pertains to nerve blockade
2. Review the variety of different approaches to the brachial plexus
3. Understand the use of ultrasound guidance for brachial plexus blocks and local anesthesia.

**Legal Briefs: Interesting and Instructive Reviews of Legal Cases**
Moderator – Matt M. Kumar, MD, JD
Randall P. Flick, MD, MPH, FAAP;
Steven C. Hall, MD
Upon completion of this lecture, the attendee will understand the common issues in pediatric anesthetic care that can lead to adverse events and litigation.

**Acute Pain Management in Infants, Children and Adolescents**
Aru Reddy, MD
At the end of this session the learner will have
1. Reviewed the current standards in assessment and management
2. Identified limits and controversies of such assessment and management
3. Examined emerging adjunctive and alternative methods for improved assessment and management
FUNDAMENTALS
of Pediatric Anesthesiology 2010

Pediatric Anesthesiology for the Generalist
April 17 - 18, 2010 • The Grand Hyatt • San Antonio, Texas
**Objectives, continued**

**PBLD 1: Classic Pediatric Short Cases**  
Jennifer Meyers, MD; Sally Rampersad, MD  
Upon completion of this PBLD, the attendee will:  
1. Be able to list appropriate emergency equipment and staffing required for the safe conduct of anesthesia for a former premature infant having a hernia repair, a child with a post-tonsillectomy bleed and an infant with pyloric stenosis  
2. Understand the reasoning for the guidelines for intra-operative and postoperative care of former premature infants  
3. Understand the induction goals and options for children with post-tonsillectomy bleeding, and pyloric stenosis.  
4. Be able to list possible options for post-operative analgesia for these 3 classic pediatric cases.

**PBLD 2: Pediatric Airway Emergency**  
Christina M. Pabelick, MD; Davit T. Haile, MD  
1. Foreign body aspiration  
   - Upon completion of this lecture, the attendee will understand the physiology and pathophysiology of upper and lower airway obstruction  
   - Upon completion of this lecture the attendee will know how to induce patients with upper or lower airway obstruction  
   - Upon completion of this lecture, the attendee will have an understanding of the anesthetic concerns children with foreign body aspiration  
2. Open globe injury in a child with full stomach  
   - Upon completion of this lecture, the attendee will understand the anesthetic implications of children undergoing emergency surgery with full stomach  
   - Upon completion of this lecture, the attendee will be able to make decisions regarding anesthetic induction in a child with open globe versus full stomach  
   - Upon completion of this lecture the attendee will understand the anesthetic implications during induction in patients with an open globe  
3. Child with croup/epiglottitis (Optional)  
   - Upon completion of this lecture, the attendee will be able to differentiate the symptoms of croup and epiglottitis  
   - Upon completion of this lecture, the attendee will know how to manage these patients logistically (ER vs. OR)  
   - Upon completion of this lecture the attendee will understand the anesthetic management of children with croup versus epiglottitis  

**PBLD 3: PACU Dilemmas in Infants and Children**  
Aru Reddy, MD; Susan R. Staudt, MD  
Upon completion of this lecture, the attendee will:  
1. Understand the evidence for anesthetic neurotoxicity as demonstrated in animal studies.  
2. Be able to discuss the potential complications and the safe use of topical phenylephrine in the perioperative period.  
3. Have learned some of the clinically significant drug interactions between anesthetic and other drugs.  
4. Recognize other confounding factors during anesthetic induction.  
5. Describe strategies to avoid laryngospasm; will have learned how to treat laryngospasm, and will know the potential consequences of mismanagement of this condition.

**Laryngospasm and Other Airway Events in Kids**  
George D. Politis, MD, MPH  
Upon completion of this lecture, the attendee will know factors associated with occurrence of laryngospasm, will have learned how to treat laryngospasm, and will know the potential consequences of mismanagement of this condition.

**The Perils of Topical Phenylephrine & Other Medication Events**  
Sanjay Madhav Bhananker, MD, FRCA  
Upon completion of this lecture, the attendee will:  
1. Be able to discuss the potential complications and the safe use of topical phenylephrine in the perioperative period.  
2. Have reviewed the data from the POCA Registry related to perioperative cardiac arrest secondary to medication related events.  
3. Have learned some of the clinically significant drug interactions between anesthetic and other drugs.

**Bleeding, Transfusion & Cardiac Arrest: Transfusion Related Complications in Kids**  
B. Craig Weldon, MD  
Attendees will develop an understanding of the indications and contraindications of various blood products in pediatric patients.

**Does Anesthetic Exposure in Young Children Cause Learning Disabilities?**  
Andreas W. Loeppke, MD, PhD, FAAP  
1. Understand the evidence for anesthetic neurotoxicity as demonstrated in animal studies.  
2. Be able to discuss the potential complications and the safe use of topical phenylephrine in the perioperative period.  
3. Be familiar with the emerging attempts of evaluating the effects of anesthetic or sedative exposure on long-term neurodevelopment in children.  
4. Recognize other confounding factors during perioperative care with implications for neurodevelopmental outcome.  
5. Be able to differentiate between the currently available cuffed tubes (High pressure low volume vs. low pressure high volume cuffed tubes) in pediatric anesthesia.

**The Obese Child: They Are Not Small Adults**  
Paul J. Samuels, MD  
1. Recognize the public health issues associated with pediatric obesity  
2. Describe the anesthetic implications of pediatric obesity  
3. Identify the impact of weight loss surgery in pediatric patients  
4. Recognize the use of cuffed ET tubes in children  
5. Understand the need for cuff pressure monitoring and the safe use of topical phenylephrine in the perioperative period.

**Credentialing for Pediatrics: Coming Soon To Your Practice**  
Randall M. Clark, MD, FAAP  
Attendees will understand the credentialing process and potential changes that may apply specifically to pediatrics.
