WALK-AROUND POSTERS

Thursday, October 11, 2012

1:30 - 2:45 pm

AIRWAY

AIR-1 A Comparison of the GlideScope® Video Laryngoscope and the Storz OS® Video Laryngoscope for Endotracheal Intubation in Children Younger than Two Years of Age

AIR-2 Evaluation of Common Practices in Use of Laryngeal Masks in the Pediatric Population

AIR-3 Initial experience of the i-gel supraglottic airway by the residents in pediatric patients

AIR-4 Effect of Cuff Endotracheal tube on the requirement of oropharyngeal oxygen and volatile anesthetic agent among Children: A Comparative Study

AIR-5 Variable Clinical Finding in Siblings with Congenital High Abduction Syndrome (CHAS), and a Review of Literature

AIR-7 Laryngeal Mask as Effective Alternative Airway Management in Pediatric Major Surgery

AIR-8 Tracheal Intubation with Airway Scope Assistance Using an Intlock Blade in Infants and Neonates

AIR-9 Successful treatment in refractory status asthmatics with isoflurane in three pediatric patients

AIR-10 Prospective Randomized Comparison of the Ambu® Aura™ and an‘O‘Intubating Laryngeal Airway as a Conduit for Tracheal Intubation in Children

AIR-11 Perioperative airway management of congenital tracheal stenosis in infants with heart disease

CARDIO/OFFER

CAD-11 A 19 year old with Williams syndrome and Moyamoya disease who underwent cardiopulmonary bypass for repair of supravalvar aortic stenosis.

CAD-12 Development of a Pediatric Anesthesia Curriculum for Dental and Oral Maxillofacial Residents

CAD-13 Distal Obstructive Duct in Pediatric Septic Shock

CAD-14 A Quality Improvement Project to Reduce Postoperative Respiratory Complications in Children

CAD-15 Establishing a portfolio of quality improvement projects in pediatric anesthesia: a descriptive study

CAD-16 Knowledge and Attitudes toward Anesthesia: A Survey of Children and Parents

CAD-17 Effect of Dx/Ex Sedation on Heart Rate Variability in Pediatric Critical Care Patients WITHDRAWN

CAD-18 A National Survey of Global Health Education and Opportunities in Anesthesiology Residency Programs

CAD-19 Cost-effectiveness of an outreach surgical camp for cleft lip and palate in Bangladesh

CAD-20 Mortality and 30-days mortality following cardiac anesthesia for congenital heart disease at the Heart Institute in Maputo, Mozambique

EDUCATION/OFFER

EDO-21 Establishing Regional Anesthesia Competency Utilizing a novel Ultrasound-Guided Regional Anesthesia Simulation Model and Cognition Testing

EDO-22 Characterizing Better and Worse than Average Teaching of Residents Physicians

EDO-23 Surgical Stability for Pediatric Cardiopulmonary Bypass Interventions - Is There a Standard of Care?

EDO-24 Resident Education on Preoperative Evaluation

EDO-25 Office-based minor general surgical procedures utilizing a pediatric sedation service model.
