

SPA 23rd Annual Meeting Supporters, Exhibitors & Product Descriptions

Anesthesia Safety Products

Arizant Healthcare Inc.

Arizant Healthcare Inc. pioneered forced-air warming technology with the introduction of the Bair Hugger® therapy in 1987.

With the introduction of the Ranger® blood/fluid warming system and, most recently, the Bair Paws® patient adjustable warming system, our products have been used to maintain normothermia over 100 million patients worldwide. www.arizanthealthcare.com

Aspect Medical Systems, Inc.

B. Braun Medical Inc.

A global leader in, infusion therapy, pharmacy and regional anesthesia, and a pioneer in passive safety devices and DEHP/PVC-free products, B. Braun Medical Inc. is committed to translating customer needs into products with unmatched quality, cost-effectiveness, environmental responsibility, and safety.

Founded in 1839, B. Braun currently employs over 38,000 professionals worldwide and provides innovative products and support services to both the hospital and outpatient markets.

CAS Medical Systems, Inc.

CAS Medical Systems, a leader in vital signs monitoring systems, presents the FORE-SIGHT® Cerebral Oximeter, a compelling new technology for the continuous monitoring of absolute cerebral tissue oxygen saturation. This non-invasive device enables tailored patient management and a reduction in catastrophic desaturation events.

Covidien

Covidien, formerly Tyco Healthcare, is a global \$10 billion manufacturer of leading medical devices and supplies, imaging products and pharmaceuticals. The Company employs more than 43,000 people worldwide and is dedicated to working with medical professionals to improve patient outcomes. Its portfolio of leading brands includes Autosuture, Kendall, Mallinckrodt, Nellcor, Puritan Bennett, Syneture and Valleylab.

Draeger Medical, Inc.

Dräger is an international leader in the fields of medical and safety technology. Dräger products protect, support and save human life.

The Dräger medical division provides Integrated enterprise-wide medical information management solutions, Innovative products with best-in-class applications performance, comprehensive solutions to optimize the clinical processes and a complete services offering.

Dräger's products, services and integrated system solutions accompany the patient throughout the care process – Emergency Care, Perioperative Care, Critical Care or Perinatal care and Home Mechanical Ventilation. For more information, visit www.draeger.com.

Invivo**Precess Patient Management Configuration**

The Precess Patient Management Configuration is a revolutionary monitor that is built off of Invivo's flagship Precess 3160 platform and utilizes the industries ONLY Wireless ECG, Wireless SpO2 and Wireless Respiration patient vital signs.

The Precess Patient Management configuration helps close the gap between MRI monitors and OR monitors. This new monitor from Invivo features the MRI industries first flexible mounting. Now anesthesia providers can have their MRI monitor mounted to their anesthesia machine just like they do in the OR. Mounting the entire MRI monitor to the anesthesia machine provides 1 common location for the clinician to access their equipment. This aids in quick actions and decisions during crisis situations which could result in a better patient outcome. Clinicians now have better access to the patient by having all lines from the MRI monitor and the anesthesia machine from a single location.

In addition to anesthesia mounts for all MRI anesthesia machines, this monitor also can be mounted to a wall or MRI table to help provide more usable room and better patient access in the MRI; a clear workflow advantage. This is extremely beneficial for smaller MRI rooms such as Mobile MRI environments. One clear advantage of removing the traditional MRI monitor roll stand is that continuous monitoring during patient transportation is now effortless. Patients can now travel from induction or recovery room to the MRI without changing monitors. This provides an increased standard of care and improved throughput by using a single monitor to do what has traditionally taken two monitors.

Precess

Precess is developed from the ground up for MRI use. Every component of the monitor is designed to withstand this harsh environment. This quality is represented by Precess's 5,000 Gauss compatibility regardless of parameter configuration.

Precess is the first MRI monitor to debut a smart battery management system. This system displays the battery life for each device, which eliminates problems while increasing patient safety. All devices feature user replaceable batteries, which allow for continuous battery operation.

Wireless ECG and SPO2 feature shorter cables designed to increase throughput. Shorter cables also reduce the risk of cable heating and are less prone to damage. Precess delivers the new standard of MRI patient care.

Precess has advanced Digital Signal Processing to eliminate gradient and high field artifacts. This software-based system allows the unit to evolve as new sequences and MRI systems are developed.

Contact Invivo

Kimberly-Clark Healthcare

Uniquely designed for pediatrics, MICROCUFF* Pediatric ET Tubes from Kimberly-Clark Health Care provide the benefits of a cuff with breakthrough features to enhance safe use for pediatrics. Its advanced micro-thin cuff

provides efficient ventilation and reliable monitoring with low rates of re-intubation, while sealing the airway at ultra-low pressure which reduces the risk of tracheal trauma.

Anatomically-based intubation depth marks and tube design allow the cuff to be placed lower in the trachea, reducing the risk to the pressure-sensitive larynx. Whether your needs involve preventing healthcare-associated infections, surgical and digestive solutions or pain management, with Kimberly-Clark you'll always have one less worry.

King Systems Corporation

LMA North America

LMA North America, Inc. is a San Diego-based company dedicated to continuously improving patient care through the marketing and sales of high quality, innovative, proprietary products for anesthesia and critical care. The LMA™ family of products have significantly improved patient outcomes and been used on over 250 million patients worldwide.

Masimo

Masimo (NASDAQ: MASI) is a global medical technology company that develops and manufactures innovative noninvasive patient monitoring solutions, including bedside and handheld medical devices and a wide array of sensors. A key medical technology innovator, Masimo is responsible for the invention of award-winning noninvasive technologies that are revolutionizing patient monitoring, including Masimo SET

MEDRAD, Inc.

MEDRAD® Performance.For life™. Our products and our people provide outstanding performance every time. You'll find that same level of performance with our Veris MR Vital Signs Monitor and Continuum MR Infusion System. Visit Booth # 109.

Oridion Capnography Inc.

Oridion Capnography Inc.

160 Gould St.

Needham, MA 02494

capnographyusa@oridion.com

www.oridion.com

Oridion Medical is a global medical device company specializing in patient safety monitoring. Microstream capnography, with its innovative patient interface technologies delivers effective, proven airway management providing the earliest indication of airway compromise for all patients: infant through adult. Oridion CO2 monitoring devices are used in all sedation procedures, ICU, PACU, OR and emergency services. Oridion is allied with leading medical device companies including Philips, CareFusion, Medtronic, Nellcor, Datascope, and others.

PharMEDium Services

SonoSite, Inc.

SonoSite, Inc. is the world leader in hand-carried ultrasound. Through its expertise in ASIC design, SonoSite is able to offer imaging performance typically found in costly ultrasound machines weighing more than 300 pounds in a system that is approximately the size and weight of a laptop computer.

This breakthrough is transforming and expanding the worldwide diagnostic ultrasound market by serving existing clinical markets more efficiently and creating new point-of-care applications where ultrasound was either

too cumbersome or too expensive to be used before.

With over 45,000 systems sold since 1999, SonoSite® products are known for exceptional performance, ease of use and durability.

TIVA HealthCare

Why TIVA? We uncover the right opportunities for your needs. Our placement specialists are physician trained and equal experts in Locum Tenens and Full-Time placements. With nation-wide opportunities and resources of a leading physician management organization, our infrastructure allows you to do what you do best and we'll take care of the rest. 800-506-8482, www.tivahealthcare.com

Truphatek International, Ltd.

TRUVIEW EVO2 INFANT SIZE INDIRECT OPTICAL LARYNGOSCOPE FOR DIFFICULT AND ROUTINE INTUBATIONS OF NEO-NATES AND UP TO ONE YEAR OF AGE. IMPROVES LARYNGEAL VIEW AND CORMACK & LAHANE GRADE. SUITABLE FOR ORAL AND NASAL INTUBATIONS. PROVEN CLINICAL BENEFITS IN INTUBATING DIFFICULT PEDIATRIC SYNDROMES. PROVIDES OXYGEN. SAFE, PORTABLE, DURABLE, EASY TO CLEAN. CONTACT TRUPHATEK INTERNATIONAL LTD OF ISRAEL, WWW.TRUPHATEK.COM

Verathon Medical

The GlideScope® Video Laryngoscope, from Verathon®, is designed for 1st Pass Success. GlideScope® offers a consistently clear view of the airway, enabling quick intubation. With its innovative design, GlideScope® is less traumatic for patients than traditional methods, and is easy to learn, use and teach. www.verathon.com
